

Why work with us?

When it comes to the decision of which recovery program to utilize, the choice is simple: New Day Recovery.

We work with our clients in every step of their recovery journey from medical detox to residential treatment, sober living and counseling.

On Demand Counseling, the sister company of New Day Recovery, works in tandem with New Day to provide quality mental health counseling and treatment

ON DEMAND COUNSELING

Veterans Outreach Program

Addiction Treatment | Counseling
Community | Compassion

Our Services

Counseling & Treatment

Inpatient:

- Medical detox from drugs & alcohol
- Residential programs for both men and women

Outpatient:

- Mental health counseling
- Medication assisted treatment (MAT)
- Psych medication management

Transportation

We partnered with Lyft to provide free rides to treatment at all of our facilities. For local clients, On Demand's drivers will provide rides to and from treatment, if needed. On Demand will also provide rides to those who obtain jobs through our staffing services.

Medical Services

On Demand Counseling is an affiliate of On Demand Occupational Medicine (ODOM). ODOM provides:

- Primary & immediate care services
- Pharmacy onsite
- Drug & alcohol testing
- Vaccinations
- X-ray services

How It Works

The Assessment

Our mental health professionals will meet with clients to provide full assessments of any medical concerns and mental health needs.

The Plan

Clients will work with their case managers to establish a medical plan that fits their needs.

The Treatment

Case managers adjust treatment levels and concerns as the client moves through the established treatment plan. Clients can participate in any and all parts of the New Day Recovery/On Demand Counseling continuum as needed. Counselors support clients in every step of the recovery journey.

Afterwards

Our team can also work with clients to help place them in the workforce. Be sure to ask about On Demand Staffing.

About **1 in 15** veterans had a past year substance use disorder.
 - 2015 study by Substance Abuse and Mental Health Services Administration (SAMHSA)

Ensuring Quality Care

Case management offers clients the aid of a licensed professional to help with coordination of services outside of treatment.

- Communication with legal entities
- Finding safe housing
- Helping the individual with employment opportunities
- Introduction to outside support services and groups
- Providing documentation
- Making referrals for other services
- Helping the individual with educational needs
- Ensuring that all appropriate parties are notified of progress and issues

Insurance Coverage
